SKILLS

- **Programming Languages:** Python, Java, C, C++, SQL, Flutter, Firebase, ReactJS, HTML, CSS, PyTorch, OpenCV

EDUCATION

- **SRM University AP** **CGPA 8.04** 2021- 2025
Bachelor of Science in Computer Science and Engineering Guntur, India

EXPERIENCE

- **SRM University AP** May 2023 - Dec 2023
Research Intern Guntur, India
 - **Object Image Analysis**, developed a system for detecting and recognizing hand signs using OpenCV to facilitate human-computer interaction without direct physical input. This project aimed to create a robust, touchless interface by leveraging computer vision and machine learning techniques.
 - Utilized keypoint and edge detection in OpenCV for feature extraction, applying permutation importance to identify key features.
 - **Feature Selection for Tuberculosis Disease Classification**. Categorizing Tuberculosis (TB) using gene expression data through a meticulous methodology. Employed RandomForestClassifier and XGBoost algorithms, with model adjustments based on accuracy, precision, recall, and confusion matrix metrics.
 - Identified significant genes via permutation importance analysis, highlighting RandomForestClassifier's superior performance in classifying TB patients and healthy controls. Offers valuable insights into effective TB classification methods and gene expression complexities.
- **APSSDC** June 2023- Aug 2023
Web Development SRM University AP
 - I acquired proficiency in HTML, CSS, and JavaScript, and became an expert in Bootstrap 5 and the Django framework.
 - I applied these skills effectively while working on a real-time project, gaining valuable hands-on experience in web development.
- **Unipool (Microsoft Founders Hub)** Dec 2023 - Aug 2024
App Development Intern Remote
 - Engaged in app development using Flutter and Firebase, focusing on creating interactive user interfaces and implementing efficient data storage solutions.
 - Developed applications with features such as user authentication, data retrieval, and real-time updates, enhancing user experience and engagement.
- **Instinct (Startup Project)** July 2023 - Jan 2024
Co-Founder & Web Designer / Editor Remote
 - Co-founded "Instinct," a podcasting startup focused on creating engaging content across various topics.
 - Played a key role in web design, developing an intuitive and user-friendly interface for the startup's website to enhance audience reach and engagement.
 - Acted as a podcast editor, refining audio quality and ensuring seamless content delivery, contributing to the overall quality of podcast episodes.
- **Viswam.AI** May 2025 - Sep 2025
AI Developer Intern Remote
 - Selected for the Summer of AI 2025 internship program by Viswam.AI—a 4-week, intensive and hands-on experience focused on practical AI development. As part of this program, I worked on real-world projects and industry-aligned assignments while contributing to the development of the world's first foundational Telugu Large Language Model (LLM). This experience enhanced my understanding of applied AI, model training, and collaborative research in regional language technologies.

PROJECTS

• AutoML Tool

Tools: [List of tools and technologies used]

- Developed a user-friendly AutoML tool for streamlined Exploratory Data Analysis (EDA) and model training, enabling efficient data uploading, robust EDA, and machine learning model training for both regression and classification tasks.

• Voice Assistant

Tools: [List of tools and technologies used]

- Created a Python-based voice assistant to streamline daily tasks. Integrated functionalities include opening Google, accessing YouTube, navigating Google Maps, providing weather updates, and displaying CodeChef rankings.
- Mastered Python programming and utilized libraries such as GTTS for voice interactions and API integrations, enhancing user experience and engagement.

• Web Application for Smart Agriculture

Tools: [List of tools and technologies used]

- Built a comprehensive web application using the XAMPP stack (Apache, MySQL, PHP) for backend development and a user-friendly frontend with HTML, CSS, and JavaScript.
- Implemented features like real-time inventory tracking, temperature/humidity monitoring, a product quality grading system, and order management capabilities. Integrated secure login, payment gateways, and enabled remote accessibility to streamline warehouse operations management.

• Anonymous Chat Application (Campus Connect)

Tools: [List of tools and technologies used]

- Developed "Campus Connect," an anonymous chat application designed to foster communication among students from various universities.
- Implemented a secure login system using organization email addresses to ensure user privacy and confidentiality.
- The platform allows users from institutions like SRMAP, IIT, VIT, and others to engage in meaningful conversations, providing an intuitive interface that enhances user experience and promotes meaningful exchanges.
